Bowel Cancer Screening Information in other Languages
This resource is for members of the community for whom English may not be their first or preferred language.

Bowel cancer screening information is not available in every language at present. This is something that Answer Cancer hopes to build upon in the future. If you are able to translate a leaflet into a language not listed, please contact us.

Public Health England have created a range of leaflets in other languages on behalf of the NHS. These leaflets explain in detail what’s involved, who’s invited, what they can expect at each stage and how people will be informed of their results.

At present they are only available in the languages listed here. Click the buttons on the right to access each resource.

There are also short animation videos explaining how to use the bowel cancer screening kit, with translated subtitles or British Sign Language available.

Subtitles are available in English, as well as Arabic, Bengali, Chinese (simplified and traditional), Farsi, Gujarati, Polish, Portuguese, Punjabi and Urdu. A British Sign Language version is also available.
